Try a different method Activate and hold the button to confirm that you're human. Thank You! Try a different method Egyptian cotton sheets are often considered the height of luxury. They're prized for their superior softness, durability, and breathability. The distinct feel of Egyptian cotton sheets come from the unique properties of Egyptian cotton itself. Egyptian cotton has extra-long staples, which means each individual fiber is exceptionally long. For sheets to be considered 100% Egyptian, the cotton should be sourced exclusively from Egypt through sellers with a certification from the Cotton Egypt Association. Some sheet sets contain a blend of Egyptian cotton and other varieties of cotton but are simply labeled as "Egyptian cotton." These options usually cost significantly less than 100% Egyptian cotton sheets. Several other high-quality types of cotton may also be used in place of authentic Egyptian cotton to craft luxury sheets. For instance, Pima cotton, which is another type of extra-long staple cotton, enjoys widespread popularity at a lower average price. In this guide, we'll highlight some of the best Egyptian cotton sheet sets on the market. We'll also go over a few things to keep in mind as you shop for Egyptian cotton sheets to help you find the best set for your bed. Product Details Who it's best for: Hot sleepers People who own mattresses up to 18 inches thick Those who prefer very soft bedding Highlights: Pure Giza cotton in a sateen weave creates a luxuriously soft hand-feel Four pattern options Certified by Cotton Egypt Association Use this SleepFoundation.org link for the most current discount on Pure Parima sheets The Triple Luxe Sateen Sheet Set from Pure Parima delivers the high-end construction and indulgent feel people have come to expect from Egyptian cotton bedding. Each item in the set is composed of Giza cotton cultivated in the Nile River Valley. This long-staple variety is renowned for its natural breathability and exceptionally soft feel hand-feel. A 700 thread count and sateen weave accentuate these qualities, resulting in sheets that drape closely to the body without trapping heat. The sheet set has received certification from the Cotton Egypt Association, so buyers know they're purchasing pure Egyptian cotton and not an overpriced fabric blend. Pure Parima offers four eye-catching patterns for the collection. Elegant embroidery and envelope closures on both pillowcases add luxurious detailing. Each set includes a flat sheet, fitted sheet, and two pillowcases. The fitted sheet has a pocket depth of 18 inches, making this set compatible with the vast majority of mattresses made today. Each component can be machine-washed, albeit without bleach, fabric softener, and other harsh laundering agents that can damage the cotton fibers. Pure Parima recommends line-drying for optimal longevity. The company provides free ground delivery to all 50 states, as well as flat-rate shipping for most of Canada. Returns are accepted within 100 nights of the arrival date, even if you've used or laundered the sheets, though the set must be in good condition to qualify for a refund. Who it's best for: Hot sleepers Anyone with a mattress measuring 15 inches or lower Environmentally conscious consumers Highlights: Long-staple Egyptian cotton offers exceptional durability, softness, and temperature regulation Sustainably and ethically produced 100-night trial period and 1-year warranty Use this SleepFoundation.org link for the most current discount on Silk & Snow sheets Silk & Snow's Egyptian Cotton Sheets offer the same luxurious quality and long-lasting structure as many competing sheet sets, but at a fraction of the average price. Each item in this collection is produced from long-staple Egyptian cotton grown in fields certified by the Better Cotton Initiative, an organization that promotes both sustainable agriculture and fair worker treatment. At every step of the supply chain, measures are taken to reduce emissions and limit wastewater discharge. A sateen weave brings out the naturally soft hand-feel of the material, resulting in sheets that drape closely to the body, but a 300 thread count keeps them feeling lightweight and breathable during hotter times of the year. You can choose from five different neutral color schemes, any of which will fit in with most bedroom decors. The fitted sheet's pocket depth makes the set compatible with any mattress up to 15 inches thick. A standard set includes a flat sheet fitted sheet, and one to two pillowcases depending on the selected size. You can also opt for a matching standalone duvet cover, or patterned sheets People who struggle to put on the fitted sheet correctly Customers comforted by a long return window Highlights: Smooth, buttery feel Blend of Egyptian and Indian cotton for better affordability Sateen weave is soft and breathable New Brookline Customers can use code HOLIDAY15 to get 15% off their orders The Brookline Luxe Core Sheets are an excellent value buy that combines quality and comfort with ample style options. Standard options include white, cream, steel, graphite, navy, smoke stripe, window pane, graphite grid, and graphite and steel Oxford stripe. Brookline also offers vibrant limited edition colors and patterns for shoppers looking for a more distinctive look. The core bundle includes a fitted sheet, a flat sheet, and two pillowcases. Customers who would like to add a duvet and extra pillowcases can choose the hardcore bundle, while those who only need a fitted sheet and pillowcases can opt for the starter set. The fitted sheet can accommodate mattresses between 10 and 15 inches thick, and short and long labels simplify making the bed. Each pillowcase has an envelope closure to limit shifting and spillage. Custom sets are also available, so customers can mix and match different sizes and colors. Featuring a smooth sateen weave, these 480-thread count sheets have a somewhat luminous finish and a buttery feel. They're made of long-staple cotton from Egypt and India, saving customers money without skipping on the luxury, breathability, and durability. The sheets are OEKO-TEX Certified, which means they've been tested for some of the most common potentially harmful substances. Brookline recommends washing the sheets in cold or cool water with mild detergent. You can also dry them on low heat and low tumble. Since the sheets are not treated to prevent wrinkles, some wrinkling may occur. You can iron the sheets on low as needed to smooth them. Hand drying the sheets can also reduce wrinkles. Over time, fewer wrinkles should appear after every wash. Sheets ship free within the contiguous United States. A 365-day return policy applies to the sheet set, and the company pays for return shipping for customers in the contiguous United States. Who it's best for: Hot sleepers People with sensitive skin Shoppers with limited budgets Highlights: Sateen weave gives each item a luxuriously smooth hand-feel 10 color options Approachable price-points in all five sizes Use this SleepFoundation.org link for the most current discount on Down Cotton sheets The Premium Giza - 600 Thread Count Egyptian Cotton Sheet Set from Down Cotton is an affordable option for sleepers who enjoy luxury bedding but don't want to break the bank on new sheets. Each sheet and pillowcase in this collection is constructed for durability and supreme softness, with a mid-range single-ply thread count to ensure year-round comfort and a sateen weave that enhances the fabric's buttery-soft feel. The price-point is very affordable compared to most competing Egyptian cotton sheet sets, even in larger sizes. Customers can choose from 10 different colorways, including neutrals, earth tones, and brighter hues. Every component is fully machine washable for easy care. Simply machine wash in cold or cool water using mild, bleach-free liquid detergent, and then tumble dry on a low setting. Down Cotton offers reasonable flat-rate delivery for all U.S. orders. Your purchase comes with a 30-night trial period for testing out the sheets and deciding whether or not they are suitable for you. Returns are not subject to any hidden fees and exchanges are free. Who it's best for: Hot sleepers People who prefer bedding that drapes closely to the body Value seekers Highlights: Pure Giza cotton in a sateen weave creates a luxuriously soft hand-feel Generous 18-inch pocket depth Wide color selection Use this SleepFoundation.org link for the most current discount on Royal Egyptian Bedding sheets Egyptian cotton sheets are notoriously expensive, but some bedding sets carry affordable price-points without sacrificing quality or performance. Royal Egyptian Bedding offers a wide selection of Egyptian cotton sheet sets that vary in terms of thread count and cost. We've chosen the 600 thread count collection for this list because of its balanced single-ply construction and approachable sticker price. The sheets are light and breathable, and a sateen weave enhances the material's silky-soft hand-feel. The fitted sheet has a pocket depth of 18 inches, so this set will be compatible with the vast majority of mattresses sold today - including many luxury pillow-top and other high-profile models. You can choose from a wide selection of color palettes for your set, ranging from neutrals and earth tones to more vibrant options. The set is also available in seven different sizes, including Olympic queen. Each component can be washed and dried in household machines for quick and convenient care, though Royal Egyptian Bedding recommends line-drying to preserve the structural integrity of your sheets and pillowcases. The set has received OEKO-TEX certification, ensuring none of the items contain known harmful chemicals or toxins. In addition to its reasonable pricing, the Egyptian Cotton Sheet Set qualifies for low-cost flat-rate delivery anywhere in the U.S. Your order comes with a 30-night sleep trial that includes the option to exchange for a different set and free shipping for returns. Royal Egyptian Bedding offers additional sheet sets with thread counts of 1,500, 1,200, 1,000, 800, and 400. Who it's best for: Sleepers who like a silky feel Shoppers who want to see and feel the fabric before buying a sheet set Good selection of neutral colors Highlights: Subtle sheen and a smooth, silky feel Wrinkle-resistant Moisture-wicking materials stay cool and comfortable Use this SleepFoundation.org link for the most current discount on Parachute sheets Constructed of long-staple Egyptian cotton handpicked in the Nile River Valley, the Parachute Sateen Sheet Set has a smooth feel and a hint of luster. This 280-thread count sheet set is made in a family-owned factory in northern Portugal, a country with a strong history in textile production. Since the sheets pull away moisture and allow airflow, most sleepers are likely to find them cool and comfortable. The basic sheet set includes a fitted sheet and pillowcase set, and customers can choose to add on a top sheet. Each fitted sheet fits mattresses up to 16 inches thick. Parachute makes sheets to fit twin, twin XL, full, queen, king, and California king mattress sizes. Four neutral colors are available, including white, sand, light grey, and slate. Parachute sells swatches of their fabric so that customers can see which colors or weaves they prefer before purchasing a sheet set. The Parachute Sateen Sheet Set is machine washable in cool water using mild liquid detergent and optional monogramming Use this SleepFoundation.org link for the most current discount on Peacock Alley sheets Egyptian cotton sheets have demonstrably proven to sleep cool during hotter times of the year, but some owners complain about a lack of insulation when temperatures drop. Peacock Alley's Emily Egyptian Cotton Sheet Set should mitigate this issue thanks to the composition of these items. A mid-level 500 thread count coupled with a sateen weave ensures close body draping and optimal coziness without overheating, making this collection ideal for all-season use. This set has earned Gold Seal certification from the Cotton Egypt Association, indicating the material is exclusively sourced from Egypt and does not contain fibers from other locations. The silky-soft hand-feel of these sheets and pillowcases makes them suitable for people with acne, rashes, and other conditions that cause sensitive skin. Twin, full, queen, and king sizes are available, all of which include a flat sheet, fitted sheet, and one to two pillowcases. The fitted sheet's pocket depth makes it compatible with mattresses up to 17 inches thick, a range that covers most models made today. Customers can choose from several color and pattern options for their set, and also have the items monogrammed for a luxe personal touch. Ground shipping is free for U.S. orders. The Emily Egyptian Cotton Sheet Set is backed by a 30-day trial period, provided the set is returned in its original packaging and has not been monogrammed. Egyptian cotton is a variety of extra-long staple cotton. Having extra-long staples means that each fiber is longer and finer than most varieties of cotton, giving the resulting fabric added strength, durability, and softness. Because the fibers are quite fine, Egyptian cotton sheets also frequently have higher thread counts than traditional cotton. While it is historically from the fertile Nile River Valley, Egyptian cotton is now grown in other warm climates around the world. Egyptian cotton is traditionally picked by hand to preserve the length of the staples. Many sleepers consider Egyptian cotton sheets the pinnacle of luxury, but there are other options on the market. Pima cotton is also popular for its extra-long staples, which make it somewhat comparable to Egyptian cotton without as high of an average price. American upland cotton is another common variety. While sheets made of American upland cotton tend to be more affordable, they usually aren't as smooth or durable as Egyptian cotton due to the shorter fiber length. How to Choose Egyptian Cotton Sheets With so many different materials, styles, thread counts, and weaves, shopping for the best sheets for you can be an overwhelming process. Understanding the main factors that set sheets apart may make your decision easier. What to Consider When Buying Egyptian Cotton Sheets The following criteria are some of the most important things to keep in mind when buying any type of sheet. Shoppers considering Egyptian cotton sheets should be especially leery because marketing in luxury bedding can be misleading. While high-quality materials can justify the premium price of some luxury sheets, other vendors may mislabel their sheets as "Egyptian cotton" to draw in customers. Weave: The weave is how the individual yarns are interlaced to make up the fabric. A sheet set's weave plays a role in its appearance, softness, and durability. Egyptian cotton sheets usually use a sateen, percale, twill, or pinpoint weave, each of which we'll discuss in more detail in the section below. Feel: The vast majority of Egyptian cotton sheets feel soft and smooth, but there may be some slight variations based on the thread count and weave. Some sleepers feel thicker sheets have a cozier feel, while lighter, crisper sheets are often popular with individuals who tend to overheat during the night. Egyptian cotton sheets can be expected to become softer and less prone to wrinkling over time. Fit: Since mattress depths vary a great deal, shoppers may want to look at a sheet set's dimensions to ensure a proper fit. The fitted sheet is usually the most critical piece of the set. Without a deep enough pocket, it may not be able to accommodate a high-profile mattress. Some sleepers may like the taut, smooth feel of a fitted sheet that perfectly stretches over the mattress. However, if your mattress's comfort system is designed to mold to your body, you might prefer a fitted sheet with a little extra room to let your mattress do its job. Price: True Egyptian cotton sheets are typically relatively high in price and can cost several hundred dollars. Customers can often find sheets labeled "Egyptian cotton" with a remarkably low price tag, though they may be inauthentic or contain a blend of Egyptian cotton and other varieties of cotton. While other types of cotton can produce high-quality sheets, shoppers should understand what they're getting for their money to avoid overpaying. Thread Count: Thread count is the number of threads in one square inch of fabric. Traditionally, higher thread count is usually associated with higher quality, but this isn't always the case. Some brands of Egyptian cotton sheets tally their thread count differently than others, counting each strand that makes up the yarn. Since some manufacturers use two-ply yarn, this method of counting can double the sheets' thread count. Because of this, customers should look closely at sheets that claim to have more than 600-800 thread count. We generally recommend Egyptian cotton sheets in the 400-700 thread count range. However, shoppers should keep in mind that there may not feel a significant difference between higher and lower thread count sheets, and many high-quality 200-300 thread count sheets are quite comfortable. Design, Color, and Pattern: Style-conscious customers may prioritize a sheet set's design, color, and pattern. Most Egyptian cotton sheets come in a relatively neutral palette, and some companies only produce white or off white. However, a few brands produce a more vibrant array of hues and/or prints. Shoppers looking for more colorful sheets may prefer mercerized cotton since this material tends to hold dye better. Breathability: Breathable sheets can make the difference between a warm, sweaty night and a cool, comfortable night. Egyptian cotton sheets are popular in part for their breathability. Air can permeate the weave, allowing hot air to escape and cool air to enter. Egyptian cotton also wicks moisture to keep the sleeper dry. Durability: Most people want their investment to last them a long time, but some sheet sets may fray or pill as they age, limiting their comfort and usability. The remarkable durability of Egyptian cotton sheets is one of the main characteristics that draws in customers. While you may have to spend more upfront, Egyptian cotton sheets typically last for years, which can make them an excellent value over their lifespans. Additionally, washing Egyptian cotton sheets tends to soften them, so they may become more comfortable over time. Ease of Care: Experts typically recommend washing your sheets at least once a week, and choosing sheets that are easy to care for can make the process less of a hassle. Most Egyptian cotton sheets are machine washable and dryable. However, you should always follow the care instructions provided by the manufacturer to prevent damage and shrinkage. What Types of Egyptian Cotton Sheets are Available? The weave is one of the main differentiating factors between sheet sets, and it can influence their appearance, feel, and durability. Egyptian cotton sheets typically use one of the following four weaves. Sateen Sateen is one of the most common weaves used in Egyptian cotton sheets. It uses a three over and one under pattern that creates a soft, smooth fabric that is somewhat resistant to wrinkling. Sateen sheets typically have a slight sheen. While they are breathable, they tend to be heavier than percale. Percale Percale is a basic one over, one under weave. The resulting fabric has a matte finish and a crisp feel that may be ideal for warm weather. Twill The twill weave uses diagonal ribs. As a result, the fabric tends to have a warm, fuzzy feel. Twill sheets are usually quite soft and may feel especially cozy during the winter. Pinpoint The pinpoint weave typically uses a two threads over and one thread under basketweave pattern. While pinpoint sheets usually aren't as soft as those with other weaves, they tend to be exceptionally durable. The pinpoint weave is often used in dress shirts, so many sleepers find the feel of pinpoint sheets comparable to that of a button-up. What are the Pros and Cons of Egyptian Cotton Sheets? Like any purchase, buying Egyptian cotton sheets has potential pros and cons. For many others, the main benefit of Egyptian cotton sheets is their superior softness and comfort. However, the relatively high price point can be a drawback for some shoppers. Who is Best Suited to Egyptian Cotton Sheets? By and large, most sleepers are likely to find Egyptian cotton sheets quite comfortable. However, sleepers who like the feel of luxury hotel bedding may enjoy them most. Egyptian cotton sheets are soft and smooth, and they usually allow ample cooling airflow. Individuals who prefer a crisper, lighter feel may like Egyptian cotton sheets with a percale weave, while people looking for a cozier feel or less wrinkling may favor a sateen weave. Shoppers on a budget may veer away from Egyptian cotton sheets. Other types of cotton sheets tend to be more affordable, as do polyester and microfiber sets. Some customers who like a fuzzy feel may also be better suited by other types of sheets. While Egyptian cotton sheets with a twill weave are somewhat fuzzy, they aren't as widely available as sateen or percale sheets. Customers looking for fuzzy sheets may have an easier time finding twill or flannel sheets made of other types of cotton. What is the Ideal Thread Count for Egyptian Cotton Sheets? Thread count simply refers to the number of threads in one square inch of fabric. While thread count matters, it shouldn't be the only thing customers look for in their sheets. Shoppers often see a high thread count as a mark of quality, but thread count can be deceptive. Marketers often hype or exaggerate the thread count of a sheet set. One common way to inflate the thread count is by using two- or three-ply fabric. This means that multiple threads are twisted together and then woven into the fabric, increasing the thread count without necessarily improving the quality. A thread count between 400 and 700 is generally optimal for Egyptian cotton sheets. High-quality options with lower thread counts may also be comfortable and frequently cost less. Customers should pay close attention to sheets that list a thread count over the 600-800 range in order to make sure this count is accurate. More Frequently Asked Questions About Egyptian Cotton Sheets What is the typical price range for Egyptian cotton sheets? Customers can find sheets labeled as Egyptian cotton at a wide range of price points, starting below \$100 and going upwards of \$500. Pure Egyptian cotton sheets usually cost several hundred dollars. Some sheet sets cut costs by using a blend of Egyptian cotton and other types of cotton, which can slash the price down to under \$100. How long do Egyptian cotton sheets last? How long Egyptian cotton sheets last will depend on their quality and how well you care for them. High-quality, well cared for Egyptian cotton sheets can last for over a decade. How do I wash and care for Egyptian cotton sheets? For the best results, customers should always follow the care instructions provided by the manufacturer. Most Egyptian cotton sheets are machine washable and dryable for easy cleaning. Typically, you should avoid using bleach, fabric softener, or harsh detergents on Egyptian cotton sheets. Using high heat also usually isn't advisable because it could cause shrinkage. How do I know I'm buying authentic Egyptian cotton sheets? Unfortunately, it isn't always easy to know if sheets use authentic Egyptian cotton, so customers may need to do a little digging. Certification from the Cotton Egypt Association is the gold standard for authenticity, so many companies that have this distinction display it proudly on their websites. If it isn't, customers can contact the company to ask for proof that their cotton is Egyptian. Our product experts have extensive experience testing just about every sleep product on the market. Send an email to or call us at (877) 672-8966 with your questions and we'll help you find exactly what you're looking for.
